CAREER OBJECTIVE

Backend-focused Computer Science undergraduate building toward a career in Backend and AI Engineering, with core strength in Python, FastAPI, REST APIs, and relational database design. Experienced in building secure, authenticated, production-style backend systems and integrating LLM-powered services through internship and project work. Looking to join a software development team where I can take ownership of backend architecture, contribute to real-world systems from day one, and grow into full-stack and AI engineering responsibilities.

EXPERIENCE

Generative AI Intern — SkillDzire

Remote | May 2026 – Jun 2026

- Developed AI-powered web applications using Python, Flask, and REST APIs, integrating Large Language Models (LLMs) through prompt engineering.
- Built backend functionalities and integrated AI APIs while developing responsive, production-style web interfaces.
- Applied NLP and Retrieval-Augmented Generation (RAG) techniques alongside standard software development and API design practices.
- Collaborated in a remote engineering workflow, using Git for version control and Postman for API testing and validation.

TECHNICAL SKILLS

Languages: Python, Java(Core), C, SQL, JavaScript

Backend & APIs: FastAPI, Flask, REST APIs, SQLAlchemy, JWT Authentication, WebSockets

Frontend: React.js, HTML5, CSS3, Bootstrap

Databases & Tools: MySQL, SQLite, Git, GitHub, Postman, Render

Core CS & AI/ML: DSA, OOP, DBMS, Computer Networks, Numpy, Pandas, Matplotlib

EDUCATION

Nadimpalli Satyanarayana Raju Institute of Technology (NSRIT) — B.Tech, CSE

2023 – Present | CGPA: 9.15

Sri Chaitanya Junior College — Intermediate (MPC)

2021 – 2023 96.4%

Zilla Parishad High School — SSC

2020 – 2021 | 92.6%

PROJECTS

CampusConnect | FastAPI, Python, SQLAlchemy, SQLite, JWT, WebSockets, HTML/CSS/JS

- Built a full-stack campus collaboration platform using FastAPI, SQLAlchemy, SQLite, HTML, CSS, and JavaScript, integrating modules for clubs, events, announcements, discussion rooms, notifications, and user profiles.
- Implemented secure JWT authentication and role-based access control (RBAC) for Students, Coordinators, and Admins, with permission-based actions for club/event management, registrations, and administrative operations.
- Developed real-time and data-driven features including WebSocket-based discussion rooms, club/event registrations, room-based file sharing, search, pagination, and automated notifications triggered by user activities.

MediSlot | FastAPI, SQLAlchemy, SQLite, JWT

[Live Demo](#)

- Developed a healthcare appointment booking platform with secure JWT authentication, role-based access control, and RESTful APIs for patient and doctor management.
- Implemented appointment scheduling, CRUD operations, and database integration using FastAPI, SQLAlchemy, and SQLite with a responsive user interface.

TrackForge | Flask, SQLite, Python, Bootstrap

[Live Demo](#)

- Built a study and internship tracking platform with authentication, CRUD operations, progress tracking, and dashboard features.
- Implemented secure user authentication, CRUD operations, and database management using Flask, SQLite, and Bootstrap for efficient progress tracking.
